## RATES SHEETS

This 12th Revised Edition of the EVP Rates will offer the Practitioner a more comprehensive and complete listing than ever before. They have been re-assigned and corrected and added to to make reference more easily accessible.

The number of rates published in this edition has been greatly added to, since we have a constant programme of research, and the demand is mounting, thus the listing is as comprehensive as we can make it at time of going to press. It will be noted that the Latin names are more popular than the English ones, this is the reason we have listed them first. We have tried not to make listing too difficult and technical. This Edition may be used on all existing instruments manufactured by our laboratories, and for the foreseeable future models.

It is always possible after a set of rates has been printed that other more obscure rates may be required. Bearing in mind that producing Rates is a time-consuming and expensive exercise, which is being continually added to, it has now come to the point where the search (on our Computer) or actual manufacture of a rate or series of rates not published in this 12th Edition will have to be charged at a fee corresponding to the service required. Each new rate takes some time to produce, and longer still to verify and make certain it is accurate. Therefore the following existing fees are charged for each SINGLE new rate required, fee payable with request. In order not to delay your request make sure the rate you require is not already listed, and if not, make sure you have correct spelling in either LATIN or ENGLISH. Fees listed below —

- 1 Fee for each rate not published, and to be researched supplied by our laboratory . . . £30.00 (U.S.A. Dollars 40.00) airmailed.
- 2 Fee for each multi-formulae not published, to be researched and issued (up to 4 rates in one formula) . . . £100.00 (U.S.A. Dollars 150.00) airmailed.

All instruments have a number of Patents Pending throughout the world. Every purchaser of our EVP equipment is kept informed of new developments over the years. ALL RATES published, either this 12th Edition EVP Rates, or our other Diagnostic Rates, are world copyright 1986

### MATERIA MEDICA OF HOMOEOPATHIC FORMULAS

#### RATES

The Rates listings that follow are designed for the model CC/80 Series of Electronic Vibro-Potentisers, the actual formulas are listed in our book of the above title. A full description of the action of each remedy and dosage will be given in the book, mentioned above.

New formulae to be found on page 95 researched in cooperation with International Homoeopathic Alliance. U.S.A.

#### SPECIAL NOTICE

This publication is circulated to users of our own EVP equipment, in existing models and those forthcoming in the near future. Such equipment is listed in our illustrated catalogue. The Rates contained in this book should not be made available to the general public in any form, and should not be used in any equipment other than that manufactured in our own laboratories. The terms — Electronic Vibro-Potentiser, EVP, Electronic Homoeopathic Medicine and similar terminology connected with this type of equipment manufactured in our own laboratories are strictly copyright.

The Electronic Vibro-Potentiser equipment was first made available to Practitioners in 1961, and was the world's first equipment of its kind. It is constantly being improved and the scope of research widened. We supply only direct to users, this and similar equipment listed in our catalogue is not available through agents of any kind.
